

Marouane Morfi

Computer Engineer | AI & Machine Learning | .NET & Java Developer

marouanemorfi@gmail.com · +212 620 550 787 · Marrakech, Morocco · linkedin.com/in/marouane-morfi-3a5a08294 · github.com/marouanemrf

PROFESSIONAL PROFILE

Computer Engineer focused on artificial intelligence, machine learning and software engineering. Hands-on experience building enterprise interfaces, backend services, database integrations and AI applications with .NET, Java, Python and modern frontend technologies.

EXPERIENCE

CGI — .NET / Blazor Software Engineer Intern (PFE) Developed and enhanced enterprise applications using .NET, Blazor, MudBlazor and SQL Server.	Hybrid — Rabat, Morocco 6 months
UXV Center — AI Chatbot Full-Stack Developer Intern Developed an AI-powered chatbot using full-stack technologies.	Remote — Switzerland 2 months
OCP — Software Developer Intern — Access Control Application Contributed to the development of an Access Control Application for managing and monitoring access.	On-site — Safi, Morocco 2 months

TECHNICAL SKILLS

AI / ML: Python, PyTorch, TensorFlow, Machine Learning, Deep Learning, Computer Vision, YOLO, RAG, LLMs, AI Agents, LangChain, LangGraph
Backend: C#, .NET, ASP.NET Core, Entity Framework Core, Java, Spring Boot, FastAPI, Flask, REST APIs, Microservices, RabbitMQ
Frontend & Data: React.js, React Native, Blazor, MudBlazor, JavaScript, HTML5, CSS3, SQL Server, PostgreSQL, MongoDB, SQL
DevOps & IoT: Docker, Kubernetes, Terraform, CI/CD, Redis, OpenTelemetry, Prometheus, Grafana, MQTT, CoAP, LoRa, ZigBee

SELECTED PROJECTS

AI Job Intelligence Platform: In development — RAG and local-LLM platform for semantic CV/job matching, skill-gap analysis and application support.	FaceSmart: Desktop face-recognition application using Python and computer vision.
PotholeEye: Automated pothole detection using Python, PyTorch, C++ and YOLO.	Smart Irrigation / IoT: Sensor-based monitoring and AI-assisted irrigation-need estimation.
SIGMA: Enterprise UI modernization using Blazor, MudBlazor, .NET, EF Core and SQL Server.	Real-Time Mobile Chat Application: Java/Android Studio application with a Spring Boot backend, WebSockets, SMTP, MySQL on Aiven, MVC and DTOs.

RESEARCH & PUBLICATION

Real-World Tomato Leaf Disease Detection: A Comparative Study of YOLOv5–YOLOv12 — IEEE publication. Comparative benchmark of six YOLO small variants using real-world, manually annotated open-field and greenhouse data.

EDUCATION

EMSI — Engineering Degree, Computer Engineering · Expected graduation: 2026
Chouaïb Doukkali University — Bachelor's Degree in Physics, Networks and Telecommunications fundamentals (2019–2023)

CERTIFICATIONS

GitHub Copilot (2026) · Introduction to Machine Learning, Coursera (2025) · React Fundamentals, Coursera (2024)
