PROFILE

Recent MSc graduate in Business Information Systems (MIAGE), a degree built at the interface between business processes and IT. Across three internships I have delivered end-to-end applications on three different stacks, integrated AI models into running services and worked with databases daily. Looking for a first role in full-stack development, AI engineering or data analysis — and I pick up a new technology quickly.

TECHNICAL SKILLS

Languages: Python, C#, Java, JavaScript, SQL, HTML, CSS

Backend: .NET, Spring Boot, FastAPI, Flask, Node.js — REST APIs, microservices

Frontend: React, React Native, Blazor, Flutter, Electron — component architecture

Databases: SQL Server (T-SQL), Oracle (PL/SQL), MySQL, MongoDB, SQLAlchemy — querying and modelling

AI & Data: PyTorch, NLP (BERT, GPT), YOLO, machine learning, data preparation and analysis in Python

Architecture & Quality: Clean Architecture, Domain-Driven Design (DDD), MVC, OOP, clean code

Tools & Methods: Git, GitHub, Docker, Azure DevOps, Agile (Scrum), technical documentation

Spoken Languages: Arabic (native), French (fluent), English (professional working proficiency)

PROFESSIONAL EXPERIENCE

Final-Year Internship | Business Application Modernisation

2026

CGI — global IT and business consulting firm

Morocco

- Migrated legacy business logic (COBOL, EGL) to .NET (C#) and Blazor
- Analysed business rules and verified result consistency after migration
- Queried and managed application data on Microsoft SQL Server
- Structured the code around Clean Architecture and Domain-Driven Design (DDD)
- Large team in Agile, with technical documentation
- Ran product demonstrations for clients, gathered their feedback and corrected the gaps they raised

Summer Internship | End-to-End Conversational AI Platform

2025

UXV Center — Swiss startup

Remote

- REST microservices in Python (FastAPI) and Java (Spring)
- Web and mobile clients in React and React Native
- Python cleaning and data preparation pipelines, persistence on MongoDB
- Trained and integrated NLP models (BERT, GPT, PyTorch) into the services
- Acted as Scrum Master for the team: facilitated the Agile ceremonies and tracked progress
- Presented project progress to the CEO of UXV Center
- Worked remotely in English with an international team through Azure DevOps

Summer Internship | Access Control Application

2024

OCP Group — global phosphate producer

Morocco

- Python backend (Flask) and data access layer with SQLAlchemy (ORM)
- Desktop client built with Electron for end users

PROJECTS

Irrigation Management Platform | Python, IoT, YOLO

2025 – 2026

Academic project — EMSI

Marrakech, Morocco

- Collected and consolidated continuous field sensor streams
- Predictive models for water requirements and crop disease detection
- Operational KPIs, real-time dashboard and alerting system

Personal Portfolio | responsive site, source on GitHub

2026

Self-directed — portfolio-marouane-morfi.pages.dev

EDUCATION

Master's Degree in Engineering | MIAGE — Business Information Systems

2025 – 2026

Moroccan School of Engineering Sciences (EMSI)

Marrakech, Morocco

Bachelor of Science | Physics — Networks and Telecommunications

2019 – 2023

Chouaib Doukkali University

El Jadida, Morocco

CERTIFICATIONS

GitHub Copilot

May 2026

Using AI agents to accelerate development, debugging and documentation
